PROFESSIONAL SUMMARY

- Having **3 years 7 months of experience** in the IT industry as a Frontend Developer.
- Strong experience in developing web and mobile applications using React JS, React Native, Vue JS, Nuxt JS
- Good hands-on experience with **JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS**
- Experienced in building **Single Page Application (SPA)** using React JS, Vue JS and Nuxt JS
- Hands-on experience with **State Management** using **Redux, Pinia, Zustand**
- Familiar with **SSR and SEO Optimization** using **Nuxt JS**
- Experience in implementing **role-based access control (RBAC)** and permission-based UI rendering.
- Proficient in handling API calls using Axios with centralized error handling.
- Worked in **Agile/Scrum development methodology**.
- Experience in cross-browser compatibility and responsive UI design.
- Strong team player with good communication skills and ability to work independently.

EXPERIENCE

- **Vhypotenuse Pvt Ltd - Bangalore** Dec-2022 - Jan-2026
Senior Software Engineer
As Senior Software Engineer worked on Web and Mobile scalable applications across platforms, focusing on UI/UX, performance optimization, API integration, and reusable component architecture.
- **Zysk Technologies Pvt Ltd - Bangalore** March-2022 - Sep-2022
Web Developer Trainee
Web Developer Trainee with experience in building responsive UI components, integrating APIs, and improving web application performance.

HIGHEST QUALIFICATION

- **Government Engineering College, Chamarajanagar (VTU)** 2020
Computer Science and Engineering

TECHNICAL PROFILE

- **Web Technologies** : HTML5, CSS3
- **Frontend frameworks** : React JS, Next JS, React Native, Vue JS, Nuxt JS
- **State Management** : Redux, Pinia, Zustand
- **Scripting Languages** : JavaScript (ES6+), TypeScript
- **Methodologies** : Agile Scrum, REST API
- **IDE / GUI Tools** : Visual Studio Code
- **Others** : GitHub, PrimeReact, Material UI, Tailwind CSS

PROJECTS

- **eTMF (Electronic Trial Master File)**
The eTMF (Electronic Trial Master File) application is a **clinical trial document management system** designed to help organizations efficiently store, manage, and track trial-related documents in compliance with regulatory standards. The platform ensures secure access, structured workflows, and real-time visibility into document status throughout the trial lifecycle.

The application was built using **Nuxt JS** to leverage server-side rendering for improved performance and scalability. **Tailwind CSS** was used to design a clean, responsive, and consistent user interface. The frontend

integrates with **.NET-based REST APIs** to handle authentication, document workflows, permissions, and backend business logic.

Responsibilities:

- Developed responsive and reusable UI components using **Nuxt JS**
- Implemented **role-based access control (RBAC)** and permission-based UI rendering
- Integrated frontend with **.NET REST APIs** using Axios service wrappers
- Managed global state using Pinia
- Built document listing, upload, versioning, and status tracking features
- Optimized performance by reducing unnecessary API calls and improving state management
- Ensured cross-browser compatibility and responsive design using **Tailwind CSS**
- Collaborated with backend and QA teams in an Agile development environment

Tech Stack:

Nuxt JS, Tailwind CSS, TypeScript, Pinia, REST APIs, .NET

- **Dezigncode CRM**

Dezigncode CRM is a comprehensive **customer relationship management system** designed for both **web and mobile platforms**, tailored specifically for interior design businesses. The application enables efficient management of **customers, clients, and sales leads**, improving communication, follow-ups, and overall business productivity.

The web application was developed using **React JS**, while the mobile application was built using **React Native** to ensure a consistent user experience across platforms. **Tailwind CSS** was used to create a clean, modern, and responsive user interface. The frontend was integrated with **Laravel-based REST APIs** to handle authentication, data management, and business workflows.

Responsibilities:

- Developed reusable and responsive UI components using **React JS and React Native**
- Designed modern UI screens using **Tailwind CSS** for web and mobile platforms
- Implemented lead management, customer profiles, and client tracking features
- Integrated frontend applications with **Laravel REST APIs** using Axios
- Managed global state using Redux, improving data flow and reducing prop drilling
- Handled form validations, loading states, and error handling
- Ensured consistent UI/UX across web and mobile devices
- Collaborated with backend developers and designers in an Agile environment

Tech Stack:

React JS, React Native, Tailwind CSS, TypeScript, Redux, REST APIs, Laravel PHP

- **Address Health Revamp**

Address Health Revamp is an enhanced version of the existing Address Health application, redesigned to deliver a **clean and high-performance** user experience. The platform is used to **digitally manage student health records**, allowing users to enter, update, and review health data efficiently with minimal errors.

The application was developed using **Next.js**, a React-based framework, to ensure better performance and scalability. **Tailwind CSS** was used to build a responsive and consistent UI, while **Laravel REST APIs** were integrated for backend data handling and business logic.

Responsibilities:

- Developed responsive and reusable UI components using **Next.js and Tailwind CSS**
- Improved overall **UI/UX flow** to reduce data entry time and enhance usability
- Implemented **form handling and validations** for student health records
- Integrated frontend with **Laravel REST APIs** using Axios
- Managed global state using Redux, improving data flow and reducing prop drilling
- Ensured smooth navigation and performance across multiple devices
- Collaborated with designers and backend developers in an Agile environment

Tech Stack:

Next.js (React), Tailwind CSS, TypeScript, Redux, REST APIs, Laravel PHP
